UR FOG

THE FIRST WORLD MANUFACTURER OF FOGGING SYSTEMS

We design, patent and produce fogging system technology

UR FOG is the most innovative and powerful anti-intrusion system on the market.

A team of professionals and engineers with over 20 years of experience in product development and distribution management all over the world.

We are market leader in the security sector.

Thanks to the high quality and superior technology of our products, guaranteed by the company's in-house **technical expertise** and **patents** protecting **technological innovations**.

UR FOG's philosophy is simple:

the best performing products at the best price with a focus on quality control.

UR Fog's exceptional fog emission speed performance is certainly the easiest way to compare with other existing systems.

Given the real and effective potential of this innovative security system, a rapidly expanding and growing market in business and demand has opened up, with sales volume expected to increase more than 20 times over the next 5 years.

Our quality and performance are certified worldwide.

The company is certified **UNI EN ISO 9001:2015** for the Design, production and marketing of anti-intrusion fogging systems.

UR FOG machines have been developed, thanks to the internal R&D team and laboratories, with innovative solutions for security and fully respecting international approvals and regulations.

Fogging machines have **EMC, FCC, CE** and **EN 50131-8:2019** certification.

N. 2672 QM

FIRST ONES TO HAVE CERTIFIED THEIR FOGGING SYSTEMS ACCORDING TO THE STRICT EN 50131-8:2019.

For the evaluation of its fogging systems UR FOG has relied on the accredited body APPLICA Tests & Certification AS, Norway, which has also certified the real saturation capacity, the density of fog over time, concentration, opacity and persistence.

That is why the data provided in the manuals and data sheets of UR Fog are not indicative and theoretical but real and above all certified.

The only certified Anti-Intrusion Fogging Systems for the protection of food production, processing and sales environments.

R & D

Engineering and design department.
Chemical area department.

TESTING & TEST AREAS of fogging systems

Cabins and test areas both indoors and outdoors for fog delivery and fog saturation.

PRODUCTION

Components production and assembly.
Development and production of flat mica heaters.
Electronic board test area and firmware upload.

Fluid bags and cylinders fluid filling and production.

APP UR FOG AR

AUGMENTED REALITY APP

The only App that allows to measure the room to be protected, selects the right fogging system, places the fogging system in the room and simulates the shot and the saturation of the room.

MARKETING

Marketing department, web, graphics.

The UR FOG AR App is free, download and try!

UR FOG GROUP

STEMAR Srl

Is a precision mechanical workshop.

That was born in 2011 from the experience of the partners Luca and Paolo in the aeronautical field.

The company is able to deal with **complete mechanical processes** such as milling, turning, grinding, welding, assembling of prototypes and series, construction of equipment and processing on **any type of material**.

Stemar has a technical office on **CAD CAM system programming** and a department dedicated to **products testing**.

NOREL Srl

Is a company that develops and manufactures electronic systems for different fields of application.

Since the company's foundation, in 2004, we have designed and produced boards for cars, trucks, boats, trains, airplanes, helicopters and industrial machines for both civil and military users. Our expertise range from **system engineering to hardware/firmware design**, EMC compliance and certification, boards manufacturing and consulting services.

TECHNOWAVE INTERNATIONAL Itd

Is the business unit following international sales of UR FOG group. Based in Minsk, Republic of Belarus.

It is specialized in sales and support of security fogging systems and wireless mesh technology.

Technowave actually follows distributors, OEM and large system integrators in more than 80 countries.

Yuliya Koleichick, CEO of Technowave International Ltd, has been supporting all **UR FOG international sales** from the start of UR FOG group, following all stages of product developments to the establishment of the international sales channels.

ROBOTECH Srl

Robotech srl Is a company with over 20 years experience in research and development of robotic solutions and electronic boards plus firmware.

WHY traditional alarm systems are useful but not enough to prevent theft.

17% thefts avoided

Active security systems such as anti-theft devices, sensors, infrared, perimeter, volumetric protections and surveillance cameras in most cases are ignored by certain criminals. The only function these systems have is reporting an intrusion, but not blocking it.

Passive security systems such as armoured doors and glass, gratings, anti-intrusion bars or railings are prone to being burglarized by criminals and consequently are ineffective. Everything that can be broken, in many cases, does not block the intrusion and action of criminals to carry out thefts.

Security guards or private security can be subject to aggression by criminals and turned into ineffective.

In general, less **than 3 minutes** are enough to commit a crime, as the criminals first observe where to go and what to steal.

Minimum 15 minute for the **Police** to arrive on the spot, except for inconveniences and in general to theft already occurred ...

WHY install the fogging system.

97% thefts avoided

Alarm control unit sends the signal to fogging system installed, activates the emission of a thick, white and impenetrable artificial fog:

IMMEDIATE BLOCK
ALREADY AT ATTEMPT TO INTRUDE CRIMINALS
IN FEW SECONDS
ZERO VISIBILITY

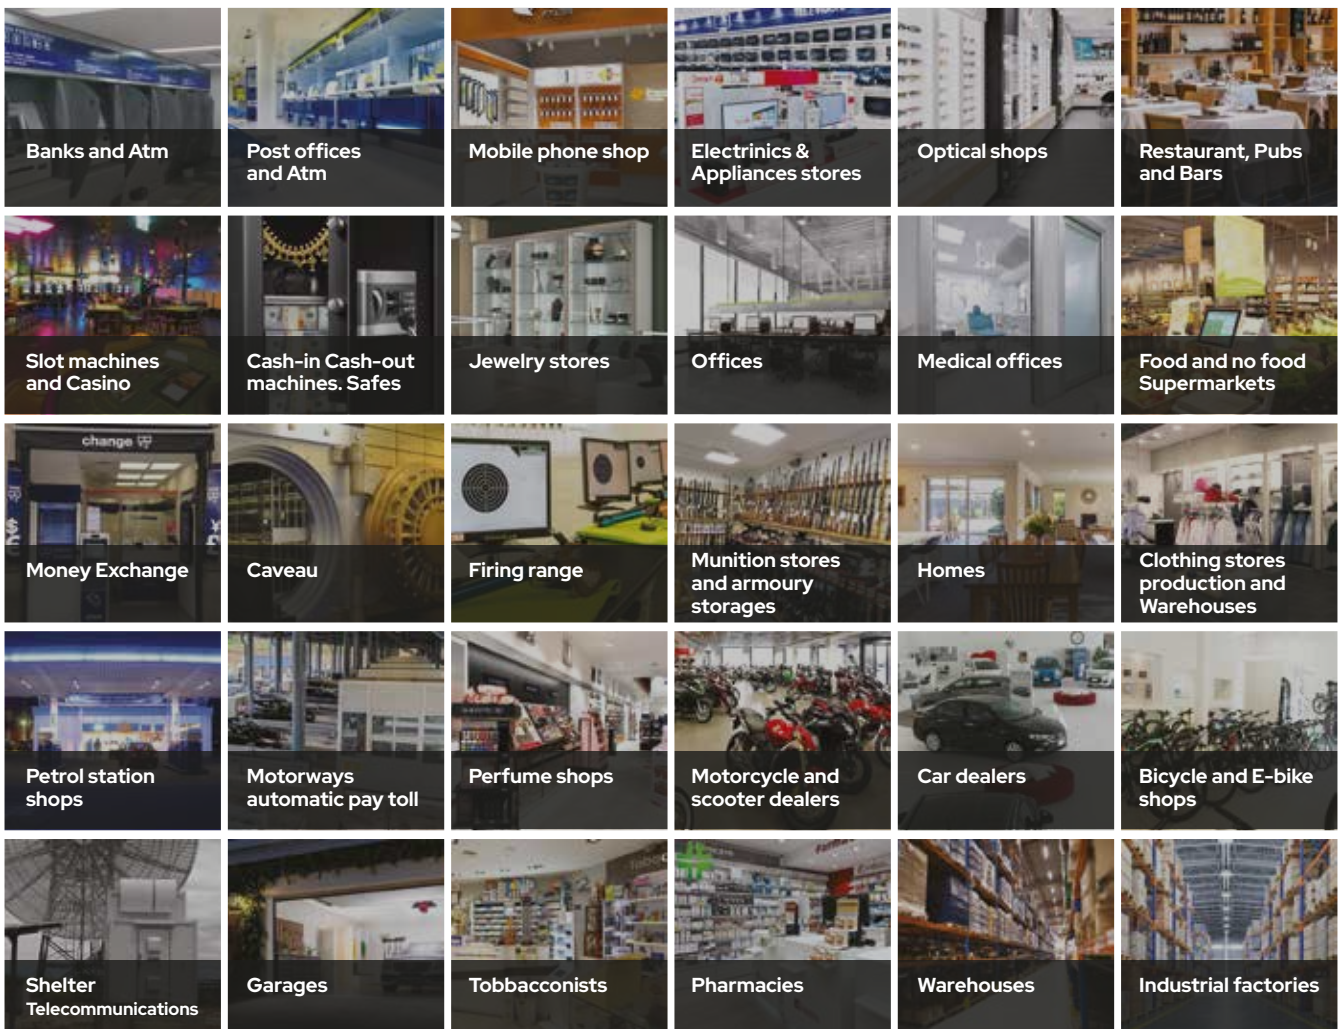

MAKING IMPOSSIBLE ANY ACTION.

Criminals disoriented by the environment saturated with thick fog, which makes **everything invisible**, are dissuaded from the attempted intrusion/theft and concentrate on finding a way out. Furthermore, the persistence of fog saturation favours the arrival time and intervention by the police.

SOLUTIONS FOR THE PROTECTION OF SMALL, MEDIUM AND LARGE ENVIRONMENTS.

Some types of commercial, business, banking and private environments for the installation of fogging systems

Always one step ahead in R&D to develop new technologies for market needs.

DOUBLE CYLINDER TECHNOLOGY

Patented double cylinder technology.

Thanks to a brand new patent the cylinders are the best solution to shoot the fog faster.

The double cylinder system is electronically controlled thus allowing the automatic change to the second cylinder once the first is exhausted, even during the shot.

The cylinders are easy to replace and disposable.

FAST PRO PLUS
Line

MECHANICAL PUMP TECHNOLOGY

UR FOG FOG STORM Pump

Patent of new Fog Storm technology on heating systems with better performances in fog ejection, speed and fog quantity.

The FOG STORM Pump and **"LAYER" heating** exchange systems technology for a fast and very dry fog shoot. Disposable recharge, very easy to replace, at a very competitive price.

FAST PUMP PRO PLUS
Line

"LAYER" HEATING TECHNOLOGY

"LAYER" heating

Designed and built for the greatest fog fluid diffusion to increase the firing time and better the quality and quantity of the fog emitted.

MODULAR
Line

MODULAR PLUS
Line

BATTERY TECHNOLOGY

TEMPEST

Battery-operated.

Proprietary technology covered by two international patents.

Self-balanced shooting system (**patented**).

BAT 300
TEMPEST TECHNOLOGY

NEW

COMPACT FOG EXCHANGE SYSTEM TECHNOLOGY

Low power consumption.
Small size and high performances.

COMPACT 390

Adjustable nozzle with anti-tampering tamper.

Adjustable nozzle to direct the shot in an optimal way.

Tamper to signal and prevent nozzle clogging. Development and **patent** of nozzle tamper feature. For Fast Pro Plus and Fast Pump Pro Plus fogging systems.

Patented serial protocol for expansion boards.

Standard for all fogging systems.

INTEGRATION WITH ALARM PANELS

UR FOG fogging systems are compatible with all alarm panels.

Some of the main alarm manufacturers are compliant with “**UR FOG READY**” certification thanks to a **full integration** that allows to manage completely **UR FOG** units from **the alarm panel and from applications and cloud.**

ALARM PANELS INTEGRATED IN BUS OR WIRELESS

Features

FAST PRO PLUS Line

Professional line

Powerful and speed fogging systems with cylinders technology. Available for professional use and where a high security technology efficiency is required. Advanced plus board with 3 inputs, 4 outputs and a rechargeable 2 Ah battery (not included). Stronger Cabinet Pro.

UR FOG fogging systems are innovative in their technology and performances, in order to guarantee the most effective protection against thefts and they have different patents.

UR FOG fogging systems are certified by European regulation. Fog fluid is assessed as not dangerous for people and animals and does not leave residuals.

Double cylinder patented technology

One of our patent and the best way to emit fog, thanks to the automatic switch between the first and the second cylinder (when the first one is empty). They are disposable and easy to replace.

Vertical recharge 600 ml

Horizontal recharge 600 ml

Exclusive patented system that allows to detect automatically if the **nozzle** has been obstructed by sending a signal in case of tampering.

Adjustable nozzle with anti-tampering function

Pro Plus board

Single cylinder version
600 ml

Thanks to the massive insulation UR FOG fogging systems have a very **low power consumption** and can shoot for a long time in absence of mains power; temperature remains stable over time.

Long lasting operation time without mains.

The innovative thermal insulation of the heater allows UR FOG systems to work for a long period of time without mains power: from 2 h up to 3 h!

A **serial bus** allows to add additional boards to each UR FOG system for an easier **interface with all kinds of alarm centrals.**

Steel cabinet

Double cylinders version
600 ml

Predisposition for 2Ah 12V battery (not included) to power the electronic board and motors in case of mains power failure

Power supply for the electronic board and motors

FAST 031C PRO PLUS

Fog emission and saturation:

up to 600 m³ in 15 seconds
(200 m³ visibility less than 1 m)

The ideal fogging system to protect small volume spaces, shops, homes and generally all professional applications where top security technology is needed.

It is arranged to an easy wall installation and it has a lower compartment to equip boards or accessories if needed.

Features

MODULAR Line

Compact and light line

Modular is the small, powerful and flexible fogging system that includes all the fastest technologies. Despite the small dimension, it is possible to insert optional boards (such as alarm centrals, sensors, etc.) in allocated areas. The front cabinet is made of plastic material to make the wireless communication easiest between the internally installed devices and the outside.

Modular line includes all the latest patented technologies as **FOG STORM mechanical pump** and **"LAYER" technology** exchange systems for fast and very dry fog shoot.

UR FOG fogging systems are innovative in their technology and performances, guarantee the most effective protection against thefts and they have different patents.

UR FOG fogging systems are certified by European regulation. Fog fluid is assessed as not dangerous for people and animals and does not leave residuals.

It is very easy to change and has a very competitive price.

It is possible to add optional boards inside the cabinet, such as alarm centrals, sensors, etc.

Thanks to the massive insulation UR FOG fogging systems have a very **low power consumption** and can shoot for a long time in absence of mains power; temperature remains stable over time.

Long lasting operation time without mains.

The innovative thermal insulation of the heater allows UR FOG systems to work for a long period of time without mains power: from 1 h up to 2 h!

A unique **serial bus** to plug on the electronic board an add on card that allows to interface easily the machine with alarms and to control the fogging system even from remote locations. A standard protocol is available for all machines.

Power supply

Features

MODULAR PLUS Line

Compact and powerful line

Modular Plus line includes all latest patented technologies as **FOG STORM Pump** and "**LAYER**" technology heating exchange systems or fast and very dry fog shoot.

Superior electronic board equipped with 4 wired inputs : arming, shooting, programmable input and verification sensor (PIR), first three accept positive (PNP) or negative (NPN) signals. It is possible to set "active security" or "passive security". Five wired outputs with relay and an internal multislots to add multiple expansion boards at the same time.

Plastic front panel to allow wireless communication.

UR FOG fogging systems are innovative in their technology and performances, guarantee the most effective protection against thefts and they have different patents.

UR FOG fogging systems are certified by European regulation. Fog fluid is assessed as not dangerous for people and animals and does not leave residuals.

It is very easy to change and has a very competitive price.

It is possible to add optional boards inside the cabinet, such as alarm centrals, sensors, etc.

Thanks to the massive insulation UR FOG fogging systems have a very **low power consumption** and can shoot for a long time in absence of mains power; temperature remains stable over time.

Long lasting operation time without mains.

The innovative thermal insulation of the heater allows UR FOG systems to work for a long period of time without mains power: from 1 h up to 2 h!

A unique **serial bus** to plug on the electronic board an add on card that allows to interface easily the machine with alarms and to control the fogging system even from remote locations. A standard protocol is available for all machines.

UR FOG FOG STORM Pump

CPLUS electronic board

Predisposition for 2Ah 12V battery (not included) to power the electronic board and pump in case of mains power failure

MODULAR 2 PLUS

Fog emission and saturation:
 up to 600 m³ in 28 seconds
 (200 m³ visibility less than 1 m)

A compact and powerful fogging system, equipped with new patented technologies such as the **FOG STORM Pump** and the **LAYER** heating system.

CPLUS electronic board equipped with **3** serial SLOTS to insert more expansion boards at once, **5** relay cabled outputs and **4** wired inputs: arm, shoot, programmable input and verification sensor (PIR).

The front cover is made of plastic material to make the wireless communication easier between the internally installed devices and the outside.

BAT 300

TEMPEST TECHNOLOGY

The first **INNOVATIVE** and **UNIQUE** **BATTERY** fogging system with the highest level of security and **ZERO** energy consumption.

Performance (m³) visibility 1 meter (Standard EN 50131-8:2019):

100 m³ with zero visibility (UR FOG standard) in **60 seconds**

Number of shots with one cartridge:

25 m³ (8 shots), 50 m³ (4 shots), 100 m³ (2 shots) + 1 extra test shot

Shot times (seconds):

2 (test shot), 15 sec. (25 m³), 30 sec. (50 m³), 60 sec. (100 m³)

NOT A SMOKE GENERATOR :

- not explosive
- no residuals
- no leave bad smells
- can shoot more times with only 1 cartridge!

Totally autonomous for 6 months without power. Compatible with any alarm system. Ideal to be integrated with wireless alarm systems.

Design, small size and light weight: can be carried and installed anywhere!

Ideal protection against theft and intrusion in garages, homes, offices, armoured vans, ATMs, safes, trucks, boats, campers, caravans ... wherever active and immediate security protection is needed.

BATTERY TECHNOLOGY

Proprietary technology covered by 2 INTERNATIONAL PATENTS

Dimensions	L 20,0 x W 15,0 x H 30,0 cm
Weight included batteries	7,6 Kg
Weight without batteries	1,9 Kg
Color	Pure white RAL 9010
Compatible with any alarm system	yes
OEM (Original Equipment Manufacturer)	Available
Mounting positions	Vertical (wall/shelf)
Operating temperature range	-10°C +50°C
Inputs	3 wired inputs: Arming, Shooting and PIR / Panic
Outputs	3 wired outputs (max 16 V - 50 mA): empty fluid, fault, low battery
Serial ports	2 serial interfaces RS232 with UR FOG Standard protocol for expansions
Microswitch tamper for cover	Optional
External signaling LEDs	3: Red Fault - Green Ready - Blue Armed
Signaling buzzer	yes
LAN/WiFi board	opzionale
Registration on Active CCloud	yes
Multi-hole and directional nozzles	no
Nozzle extension	no

ELECTRICAL SPECIFICATIONS

Power supply	Battery
Battery model	2 custom built lead acid VRLA 12 V - 9 Ah batteries
Autonomy without external power supply	About 6 months (at 6 months a full time shoot is guaranteed)
Autonomy with external power supply	*No limit. Battery replacement recommended every 2 years
Inbuilt battery charger	yes with two external charging current options: 10-16 V / 350 mA and 1 A
External battery charger	optional
Average power consumption	Low power mode: 2-3 mW Always on mode: 1,2 W
Heating time from cold	Immediate at the time of shot
Temperature management	Self-balancing of shot with patented system

FLUID

Fluid cartridge capacity	125 ml
Disposable non-pressurized cartridge	yes
WHITE OUT FOOD GRADE fluid	yes

*** FOOD CONTACT** certification

The specific anti-intrusion fluid for environments with food or food substances. White Out Food Grade is the innovative mixture designed to safeguard food productions, processing and sales environments. Produced fog has been tested according to the Food Contact regulation to meet food products without altering their composition and organoleptic properties.

ACTIVE CLOUD

A single control panel to manage all your fogging systems from smartphones, pc, tablets

ACTIVE CLOUD LAN / WIFI BOARD

(Cod. URCLWF)

The WIFI LAN board allows wired or wireless Lan connection. Through the extremely secure Cloud service, provided for free, it allows, in addition to the systems monitoring, to remotely arm, shoot and set shooting time of the fogging system.

Developer APIs available

Ability to develop **customized connectivity solutions** for integrating **UR FOG systems** into pre-existing intranets (*banks, regulators, etc.*).

Download tools and manuals

SECURE SSL/TLS encrypted communication

REMOTE DEVICE ASSISTANCE analytical control of all features and real-time system diagnostics

WIFI & WIRED LAN on the same card

Control panel for the single fogging systems or general control of all the fogging systems installed

ARMING AND SHOOTING SIGNALS TO ACTIVATE ONE OR MORE FOGGING SYSTEMS AT THE SAME TIME

ANTI-INTRUSION FLUIDS FOR FOGGING SYSTEMS

UR FOG

**WHITE
OUT**

ANTI-INTRUSION FLUID

WHITE OUT

White Out is a mixture created to generate a real wall of fog in seconds. The formula has been designed and optimized to generate **the densest and highest persistence fog** so to **ensure zero visibility** into the premises.

The fog generated is completely **non-toxic, flavourless and leaves no residue.**

Toxicological evaluation according to EN ISO 16000-1:2006

**WHITE
OUT**
FOOD GRADE

ANTI-INTRUSION FLUID

WHITE OUT FOOD GRADE

The only certified Anti-Intrusion Fogging Systems for the protection of food production, processing and sales environments.

White Out Food Grade is the innovative mixture designed to safeguard food productions, processing and sales environments.

FOOD CONTACT certificate for **FOOD & BEVERAGE** departments.

Produced fog has been tested according to the Food Contact regulation to meet food products without altering their composition and organoleptic properties.

Tests carried out in accordance with Regulation (EC) No 1935/2004.

UR FOG AR AUGMENTED REALITY APP

UR FOG AR is the free App that allows, once the most suitable system for the environment has been chosen, to simulate the positioning and operation of the fog devices with the experience of **Augmented Reality**, previewing and in real time the experience of total protection from theft of anti-intrusion / anti-theft fog devices of UR FOG.

UR FOG Metro AR functionality : uses augmented reality technology to measure lengths in the real world with the smartphone camera.

URFOGSYSTEMS

UR FOG AJAX < READY >

Anti-intrusion system needs to be connected to a central alarm. A central alarm system increases the security to the installation of the anti-intrusion fogging system.

Wall or ceiling installation

Desk stand

AJAX
< READY >

3 WIRELESS
ACTIVATION MODES
OF THE
FOGGING SYSTEM

1 MOTION SENSORS

By motion detection and door/window opening detection **sensors**, the fog emission is automatically activated.

2 PHOTO VERIFICATION

The **MotionCam** camera motion detection takes a series of animated pictures and sends them for an accurate assessment of the situation; in case of actual need, not a false alarm, the **fog emission** can be active remotely.

3 ANTIPANIC / ANTI-ROBBERY

If needed, it is possible to activate manually the **Fogging System**, thank to the keyfob with **SpaceControl**, antipanic button, the **DoubleButton** emergency button and the **Button** antipanic button, when the system is not armed.

QUICK INSTALLATION!

No cables or connections required. Ready for wireless use. Excellent high-tech solution at lowest price.
